

# The future is coming. Are you ready?

Get 'the future of work' ready  
in just one day.

VET professional  
training day  
December 5

# Robots, VR, AI, flying cars and the world of portfolio work.

## Get ready for the brave new world of the future of work – in one day.

Fast track your knowledge and prepare your students for the new work future at 'Robots, VR and flying cars - how the future of work is changing and how to be prepared' - our one day intensive workshop on the future of work.

December 5 – book early! This outstanding line up of thought leaders, cutting edge practitioners and hands on workshops will put you the driver's seat (even if it's a driverless car!).

A professional learning day for Vocational Education and Training (VET) professionals (Tertiary, Community and Secondary educators) who coordinate or deliver entry level vocational skills sets or qualifications (VET in Schools).

As a VET professional do you have the skills to deal with the changing world of work? Young people need to be inspired and prepared to deal with the challenges that the future of work will throw at them. This training will deliver them. Don't be the one that misses this.
